
Orbit Journeys Orbital Surgeon John

henry h. emurian & joseph v. brady - the history of manned orbital spaceflight missions to date, however, shows clearly that humans are capable of enduring demanding spacelife work schedules in isolation and confinement for periods lasting more than a year in orbit. **behavioral health management of space dwelling groups** - safe passage beyond earth orbit nasa's vision for space exploration calls for humans to return to the moon by the end of the next decade, paving the way for eventual journeys to mars and beyond 1
